1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 66, line 4, delete "MS" and insert - - mobile station - -.

In claim 77, line 5, delete "MS" and insert - - mobile station - -.

The amendments correct the lack of antecedent basis for the denotation "MS" which is identified as "mobile station" elsewhere in the claims.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vehmer et al (EP 1045609) teach the conventionality of a telecommunications entity obtaining a list of cell IDs of neighboring base stations relevant to a mobile station according to a first criteria at a first time via the obtaining of the home zone list, the telecommunications entity obtaining a list of cell IDs of neighboring base stations relevant to a mobile station according to the first criteria at a second time via the obtaining of a current received cell ID list, the telecommunications entity comparing the received list of base stations to the home list of base stations to evaluate whether the mobile station is in a service providing area.

3. Anell (5,905,950) discloses a method and apparatus for determining changes in location of a subscriber wherein an assigned list of base stations is obtained by a telecommunications entity, a current candidate cell list is obtained from the subscriber by the telecommunications entity, the cell lists are compared and it is determined if a certain

Art Unit: 3662

number of cells have changed in position or dropped from the fixed list whereupon a determination is made that the subscriber has moved out of a fixed, assigned area.

4. Song (7,197,306) discloses an apparatus and method for determining changes in location of a subscriber wherein a telecommunications entity such as the subscriber obtains a list of base stations relevant to the subscriber at a first time (Home-zone list), obtains a second list of base stations currently received, compares the home-zone list to the currently received list to evaluate whether the subscriber has moved from the home zone, and automatically performs a registration process when the deviation is detected.

5. Claims 62-77 are allowed over the prior art.
